TERMS CASH IN FULL WITH ORDER earns 3% discount. Boxing and baling will be charged for at actual cost only. Cash customers will be billed for boxing after shipment. See below.

TO ESTABLISHED CREDIT, 2%-10 days from date of invoice. All accounts due 1st. of second month following date of invoice

RATES 25 trees of same size and variety at 100 rates, -250 at 1000 rates. All orders accepted subject to loss of stock or inability to deliver for any reason beyond our control.

IMPORTANT CHANGE OF POLICY

In the past we have allowed free packing in addition to a cash discount on all orders accompanied with cash in full. This was a very unfair practice and now discontinued by most nurserymen. An order for small lining out stock representing a lot of money would cost only a fraction as much to box as would a small order of heavy finished stock. Hereafter, we will allow the very substantial discount of 3% for cash with order, but boxing and baling will be charged for at cost on all orders, either for lining out or finished stock. You will be billed for boxing on cash orders.

<u>Abies balsamiae</u> (Balsam fir)				
Balsam Fir as a mature ornamental isn't worth a "hoot". But until it reaches a height of about 20 ft. it is a beautiful tree. However, its real value is in growing it for Xmas trees, because of its fir fragrance and its needle holding characteristics

AIR VIEW EAST NURSERY

MUGHO PINE

Here is a real war casualty! Previous to the war, practically all the Mugho Pine seed came from central Europe

especially the Balkan countries. Not even a few dribbles have entered this country since the war, as far as we know. Furthermore, no domestic seed is available in this country except Montana Mugho, which of course is not a dwarf type. You will note we no longer have seedlings available, nor do we believe anyone else in the country has any of the true dwarf imported type. We were fortunate in having a good supply of seed when the war began, so right now we can supply transplants in quantity, but after they are gone, there will be many years when Mugho Pine liners will be scarce, for it takes at least 4 years to grow a small 2-4 in. transplant after the seed is again available. Buying some of these Mugho Pine liners now, is one thing you can't go wrong on.
